No 11 (November) pp 761-824
No 12 (December) pp 825-896

Article index

Number 1

Dynamic participation in a computer-based conferencing system
G. Chung, K. Jeffay and H. Abdel-Wahab 7
Performance calculation for an optical MAN
J. F. Hayes and F. Ayadi 17
Congestion control protocols for inter-connected LANs supporting voice and data traffic
J. K. Roussos, E. G. Economou and G. Philokyprou 25
Prioritization in FDDI networks
R. M. Watson and S. Ward 35
The Xpress Transfer Protocol
A. C. Weaver 46
OSI RPC model and protocol
Y. Liu and D. B. Hoang 53
Capture Aloha with two random power levels
R. L. Borchardt and T. T. Ha 67

Number 2

Exact and appropriate models to obtain average throughput of the FDDI MAC protocol - Part I: Symmetric systems
K. S. Lim, R. H. Deng and K. Ranai 83
Locating concentrators in a computer network with multiple coverage for terminals
S. Narasimhan 94
A Database Handler (DBH) for broadband network administration
A. Patel and P. Gardiner 103
Distributed multimedia applications: A review
N. Williams and G. S. Blair 119
Simulation of a TDM-like protocol for Gbit/s MANs
K. C. Chua and S. Guo 133

Number 3

Special Issue: Upper Layer Protocols and Distributed Applications
Guest Editor: Dr Gee-Swee Poo,
National University of Singapore

Object-oriented modelling and specification of the X.400 mail system
W. L. Loh and G.-S. Poo 148
High performance ASN.1 compiler
M. Sample and G. Neufeld 156
Verification of ISO ACSE protocol specified in Estelle
R. Lai and A. Jirachieppattana 172
Performance analysis of the send-on-demand: A distributed database concurrency control protocol for high-speed networks
S. Banerjee, V. O. K. Li and C. Wang 189
End-to-end approach to large-scale multimedia dissemination
R. Yavatkar and L. Manoj 205
Trader cooperation to enable object sharing among users of homogeneous distributed systems
Y. Ni and A. Goscinski 218
Secure end-to-end delegations in distributed systems
T. Hardjono and T. Ohta 230

Number 4

Congestion avoidance in high speed interconnected voice data traffic LANs
J. K. Roussos, E. G. Economou and P. Georgiadis 242
Exact and approximate models to obtain average throughput of the FDDI MAC protocol - Part II: asymmetric systems
K. S. Lim, R. H. Deng and K. Ranai 251
TESTGEN: An environment for protocol test suite generation and selection
S. T. Vuong, H. Janssen, Y. Lu, C. Mathieson and B. Do 257
Delay analysis of a dual-bus LAN with reservation
J.-L. C. Wu and T.-Y. Huang 271
Cooperative multimedia editing tool for enhanced group communication
A. Santos and B. Tritsch 277
Analysis of delay bounds of a tree protocol with collision detection
W. S. Chung, C. K. Un and B. C. Shin 288

Number 5

Routing in packet-switched communication networks
H. Pirkul and A. Amiri 307
Survivable LANs for distributed control systems
J. E. Cooling 317
Priority promotion QDDB networks to improve fairness
T.-Y. Huang and J.-L. C. Wu 332
Communications services architecture for CSCW
J. A. Robinson 339
Performance of end-to-end flow control in LAN/WAN interconnection
J.-K. Min 348
Adaptive self-stabilizing connection control scheme for server-based networks
K. M. Lye, G. Y. Loo, K. C. Chua and K. G. Seah 363
The adoption of electronic trading in Western Europe
M. J. Dearlove 369

Number 6

Receiver synchronization of a packet video communication system
A. S. Andreatos and E. N. Prontonotarios 387
Reservation scheme for CRMA high-speed networks
N. F. Huang and C. C. Chiou 396
Service integration issues on an ATM DQDB MAN
S. Casale, V. Catania and A. La Corte 407
Throughput-delay characteristics of OCUM protocol for media access in multihop wireless networks with buffers
A. Chockalingham, P. Venkataram and A. Prabhakar 419
Traffic source models for ATM networks: a survey
G. D. Stamoulis, M. E. Anagnostou and A. D. Georgantas 428
802.5 priority mechanism in hard real-time RMS applications
J. Santos, M. L. Gastaminza, J. Orozco and C. Matrangola 439

Number 7

Special Issue: Security in transition
Guest Editor: Professor Sead Mufic,
Stockholm University, Sweden

I: Basic technologies

The US key escrow encryption
technology

D. E. Denning 453

Modern key agreement techniques

R. A. Rueppel and P. C. van
Oorschot 458

TESS: A security system based on

discrete exponentiation

T. Beth, F. Bauspieß, H. J. Knobloch
and S. Stempel 466

II: Security architectures

Security protection for parts of a data
structure

P. Kaijser 476

Generic interface to security services

J. Linn 483

Security architecture for distributed
systems

S. Mufic and M. Sloman 492

III: Security applications

SESAME: The solution to security for
open distributed systems

P. Kaijser, T. Parker and
D. Pinkas 501

Piloting authentication and security
services in the 'PASSWORD' project

P. T. Kirstein and P. Williams 519

Security in EDIFACT systems

T. Dosdale 532

IV: Security management

SAMSON: Management of security in
open systems

S. Lechner 538

Security management for OSI networks

A. Patel 544

Number 8

An approach to identifying QoS
problems

K. E. Mourelatou, A. T. Bouloutas
and M. E. Anagnostou 563

Adaptive Bandwidth Waste Rate: a fair
bandwidth sharing scheme for the
DQ protocol with multiple priority
classes

D. G. Jeong, C. H. Choi and
W. S. Jeon 571

Design and implementation of a
manageable B-ISDN host interface

L. H. Ngoh and A. A. Lazar 581

Analysis of collision avoidance star
LANs

A. E. Kamal and
H. S. Hassanein 589

Implementation of a decentralized
Pareto optimal algorithm

L. N. Kumar, C. Douligeris and
G. Develekos 600

Growth and implications of network
systems: technological and
legislative issues

R. Cardinali and D. Hunt 611

Number 9

Throughput efficiency of an enhanced
link management procedure

C. Ward, S. Mitra and
T. M. Phillips 626

Analysis of cell clumping caused by
ATM network GFC protocols

F. Guilleman and W. Monin 637

Performance of the node/link
behaviour of multicomputer
networks with input buffer limiting
and channel contention

S. M. Koriem and L. M. Patnaik 647

Congestion avoidance for ATM
networks

E. D. Sykas, K. M. Vlakos,
I. Ch. Paschalidis and
G. K. Mourtzinou 657

Admission-control techniques with
application to broadband networks

G. M. Stamatielos and
J. F. Hayes 663

Attacks on an ID-based signature
scheme based on Rabin's public key
cryptosystem

M. Y. Ko, T. Hwang and
C.-C. Chang 674

Synchronization protocol for high
quality and single-point playout
multimedia applications

G. F. Zhao and K. M. Lye 677

Number 10

*Special Issue: Advances in distributed
computing*

Guest Editor: Dr Ahmed Tantawy, IBM
Yorktown Heights, NY, USA

Object-oriented and functional
software design for distributed real-
time systems

S. S. Yau and D.-H. Bae 691

Fair distribution of concerns in design
and evaluation of fault-tolerant
distributed computer systems

K. H. Kim 699

Tap processes

A. El-Kadi 708

Cooperative management in open
distributed systems

V. Tschammer, T. Magedanz,
M. Tschichholz and A. Wolisz 717

Introducing intelligence in distributed
systems management

D. Gaili 729

Guaranteed quality of service for
efficient multiparty communication

C. Szyperski and G. Ventre 739

Modified composite Banyan network
with an enhanced terminal reliability

S. W. Seo and T.-y. Feng 750

Number 11

Design principles and performance for
flooding routing mesh topology
spread spectrum LANs

T. Mastichiadis, E. Economou and
A. Davies 762

Performance of a network protocol
processor

K. M. Lye, L. Chan and
K. C. Chua 771

TeamBuilder: a CSCW tool for
identifying expertise and team
formation

A. Karduck 777

Self-routing multistage switch with
repeated contention resolution
algorithm for B-ISDN

J.-J. Li and C.-M. Weng 788

Analysis of 1-ROR networks

D. Cherian and R. Mittal 799

Method for constructing a group-
oriented cipher system

C.-H. Lin and C.-C. Chang 805

The economics of astonishing counter-
example

H. Lorin 809

Number 12

Congestion control based dynamic
routing in ATM networks

S. Bahk and M. El-Zarki 826

Effect of capture on throughput of
variable length packet Aloha
systems

R. C. Robinson and T. T. Ha 836

Effect of fault tolerance and
communication delay on response
in a multiprocessor system with a
bus topology

S. Bataineh and M. Al-Ibrahim 843

Temporal synchronization support for
distributed multimedia information
systems

G. J. Lu, H. K. Pung, T. S. Chua and
S. F. Chan 852

Modified distributed snapshots
algorithm for protocol stabilization

K. Saleh, H. Ural and
A. Agarwal 863

Capacity assignment in computer
communication networks with
unreliable links

D. Saha, A. Mukherjee and
S. K. Dutta 871

EDipro—an integrated environment for
electronic data interchange

D. Zazula 876
